- (1) The policies and procedures for addressing and resolving conflict of interest between the Fund Manager or Trustee and the Scheme;
- (2) Means by which subscribers may obtain relevant information regarding the Fund.

Justification – *Collective Investment Schemes in Nigeria have traditionally been offered through the Initial Public Offer (IPO) mode –though neither the ISA nor SEC Rules prescribe any particular mode or method of offer. Consequently, Schemes’ offer processes are made subject to the involvement of prescribed parties like Issuing House(s), Stockbrokers, Reporting Accountants, and Solicitors; while the process involves a fixed Offer period, allotment etc. as well as fixed costs.*

The consequence of the foregoing has been a system that is both cost and time inefficient – leading to situations where investors’ monies remain idle for weeks pending conclusion of an Offer and allotment thereof.

Agitations by the Fund Managers Association (FMAN) as well as the then CMC sub-committee on Investment Management for an efficient system led to research which revealed that CISs/Mutual Funds offer process do not follow the ordinary IPO or Offer for subscription mode.

3. New Rule

Full Text of the Rule –

I. Marketing/Distribution fees;

Justification – *In view of FMAN’s proposal to relinquish marketing and distribution of funds to brokers and other third parties, the attendant costs will no longer be part of the fees to fund managers but will be separate costs borne by the fund and payable to the respective third party responsible for marketing and distribution.*

The old sub-rule 451(l) will now become 451(m).

5. Amendment

Name/citation of the Rule to be Amended – Contents of Prospectus / 463(e), (p) & (z)(ii)

Full Text of the Existing Rule – Every prospectus shall contain the information required by the Act and shall in addition state the following information:

- e) The offer stating the requirements of rule 466, the dates of opening and closing of the offer, and the names of the trustee and custodian to the scheme;
- p) a forecast of income of the fund for the next three (3) years;
- z) detailed information of the Fund with respect to the following:

ii) three (3) to five (5) years financial summary. Where the Fund has just been created and is yet to solicit for investment, a statement of affairs of the Fund including financial projection.

Proposed Amendment – Every prospectus shall contain the information required by the Act and shall in addition state the following:

- e) The offer stating the requirements as prescribed under these Rules and Regulations, the dates of opening and closing of the offer **for closed-ended funds and commencement date for open-ended funds**, and the names of the trustee and custodian to the scheme;
- y) detailed information of the Fund with respect to the following:
 - ii) three (3) to five (5) years financial summary for privately managed portfolios converting to a CIS

Justification – *The requirement for an offer period with opening and closing dates are only applicable to closed-ended funds since open-ended fund units, once registered, can be offered for the life of the fund and as such not restricted to an offer period. In addition, the forecast projection requirement should be expunged as they add no value to the fund since these projections are based on assumptions that always vary significantly from the market conditions in future. Furthermore, the removal of this provision will reduce*

offer costs because the fund will no longer require a reporting accountant as a party to the offer.

economies of scale will justify a renegotiation of expenses downwards to make Nigerian funds globally competitive and attractive.

(2) Name/citation of the Rule to be Amended - Basis of Computation of Bid And Offer Prices For Collective Investment Schemes / Schedule VI Note

Full Text of the Existing Rule –

Note:

Securities traded on a Stock Exchange or any regulated market will generally be valued at the last traded price quoted on the relevant exchange or market as at the date of computation. If no trade is reported for that date or if the exchange was not open on that day, the last published sale price or the recorded bid price (whichever is more recent) shall be used. Unlisted equity securities will be valued initially at cost and thereafter, as the Scheme’s Manager shall in its discretion deem appropriate. Unlisted securities (other than equities), for which there is an ascertainable market value will be valued generally at the last known price dealt on the market on which the securities are traded on or before the day preceding the relevant date of valuation and unlisted securities (other than equities), for which there is no ascertainable market value, will be valued at cost plus interest (if any) accrued from purchase to (but excluding) the Valuation Date plus or minus the premium or discount (if any) from par value written off over the life of the security. Any value otherwise than in Nigeria Naira shall be converted at the prevailing market exchange rate.

Proposed Amendment –

Note:

The closing unit price of Closed-ended funds shall be published on a daily basis on the fund manager’s website.

Securities traded on a Stock Exchange or any regulated market will generally be valued at the last traded price quoted on the relevant exchange or market as at the date of computation. If no trade is reported for that date or if the exchange was not open on that day, the last published sale price or the recorded bid price (whichever is more recent) shall be used. Unlisted equity securities will be valued initially at cost and thereafter, as the Scheme’s Manager shall in its discretion deem appropriate.

Valuation of Unlisted Securities should comply with the International Financial Reporting Standards

Justification –

For valuation of unlisted securities, IFRS is recommended since all funds have been required to comply with these standards since 2013. The previous note contradicted IAS 39, IFRS 9 and 13. In addition, the audited accounts of funds revealed that they currently comply with IFRS instead of the current provision in the SEC Rules and Regulations.

- n. Any other function the Commission may determine from time to time.

Justification: *To make "Nominee" one of the registrable functions*

2. PROPOSED AMENDMENT TO RULE 51- REPORTS TO BE FILED/SCHEDULE II (PENALTIES)

Full Text of Existing Rule 51 (1) (b)&(c):

(b) Annual accounts certified by an auditor and prepared on a calendar or fiscal year basis, shall be filed not later than six (6) months after the end of the accounting year.

(c) Where a market operator fails to file quarterly returns twice in a year and nine (9) months after the annual accounts becomes due, the market operator shall be referred for further enforcement action.

Provided that an operator who was not active during a reporting period shall file a nil return supported by affidavit.

Proposed Amendment:

(b) Annual accounts certified by an auditor and prepared on a calendar or fiscal year basis, shall be filed not later than ~~six (6)~~ three (3) months after the end of the accounting year.

(c) Where a market operator fails to file quarterly returns twice in a year and ~~nine (9)~~ six (6) months after the annual account becomes due, the market operator shall be referred for further enforcement action.

Provided that an operator who was not active during a reporting period shall file a nil return supported by affidavit.

Justification: *This amendment is based on the recommendation of the Technical Committee on Harmonization of Quarterly Returns Template comprising of the Commission and the NSE. Based on the observation of the Committee, Capital Market Operators (CMOs) file returns to the Commission using standardized templates. In particular, broker/dealers file returns to the Commission and the NSE using the same template. Filing of audited accounts to the NSE by broker/dealers is within 3 months after accounting year end. Thus, there is a need to harmonise the reporting period for all CMOs to file their returns at the same time to the Commission.*

The current practice is not in tune with the risk-based approach to monitoring of CMOs and the information required may have become obsolete six months after the accounting year of a CMO.

PROPOSED AMENDMENT TO SCHEDULE II (PENALTIES/FINES)

Full Text of Existing Rule:

- Late filing of quarterly/yearly returns (N2,000.00 per day for the period of default)
- Non-filing of quarterly/yearly returns (N5,000.00 per day for the period of default)

Proposed Amendment:

- ~~Late filing of quarterly/yearly returns (N2,000.00 per day for the period of default)~~
- ~~Non-filing of quarterly/yearly returns (N5,000.00 per day for the period of default)~~
- Late/ non-filing of quarterly/yearly returns (N5,000.00 per day for the period of default)

Justification:

This will remove the ambiguity on when to apply penalty for late filing and non-filing of a return. The penalty is also expected to be a deterrent to non-compliance to the relevant rules.

3. PROPOSED AMENDMENT TO RULE 57- NET CAPITAL REQUIREMENT

Full text of Existing Rule: Net Capital Requirement

(1) No broker or dealer shall permit his aggregate indebtedness to exceed 10 times its net capital.

(2) Net capital shall be computed as specified below:

(a) Determine equity by subtracting the broker-dealer's liabilities from its assets (broker-dealer assets include cash; money owed by customers and other broker-dealers; securities held in proprietary trading and investment accounts; and fixed assets like buildings, furniture and equipment. Broker-dealer liabilities include money owed to customers and other broker-dealers, bank loans, debt securities issued by the broker-dealer, or funds loaned to it by the parent company);

- (b) Add back certain subordinated liabilities to equity, subject to certain conditions;
- (c) Deduct illiquid assets, such as the value of fixed assets from equity;
- (d) Deduct unsecured receivables.

Proposed Amendment: Net (Liquid) Capital Requirement

- (1) No broker or dealer shall permit its aggregate indebtedness to exceed 10 times its net liquid capital.
- (2) Net (liquid) capital shall be computed as specified below:
 - (a) Determine net worth by subtracting the broker/dealer's total liabilities from its total assets;
 - (b) Deduct illiquid assets such as the value of non-current assets from net worth
 - (c) Deduct Haircut Charge

Justification: *Use of "Net Liquid Capital" instead of "Net Capital" better portrays the subject matter which is liquid capital after haircut. Also the proposed computation is more straight forward and easier to understand.*

4. PROPOSED AMENDMENT TO RULE 58: DETERMINATION OF NET (LIQUID) CAPITAL

Full Text of Existing Rule:

(1) Every stock broker (broker/dealer) registered with the Commission shall compute and report in all statutory report/filing its Net (liquid) Capital applying the following procedures:

(a) Total asset

Less: total liabilities

Net-Worth

Add: Reserves/earning

Subordinated loans

Net capital before adjustments

(b) Less: Fixed assets

Prepaid expenses

Exchange membership fee

Unquoted investments

- Unsecured receivable (loan)
Net capital before provisions
(c) Less: Provisions (Haircuts)
Net (liquid) capital
(d) Less: Required minimum capital base
Within threshold/in excess/shortfall

(2) Definition of Terms

Networth means the difference obtained when the liabilities are subtracted from the assets of a stockbroking firm.

Prepaid Expense means payment in lieu of service or goods delivery. It is an asset to the company not immediately recoverable.

Unquoted Investment means investment in securities that are not listed on the stock exchange. The value of such investment cannot be immediately determined.

Unsecured receivable (loan) means a debit balance on the account of clients that are not covered by any collateral, but by the assets acquired by the stockbroking firm under a margin loan agreement or any other form of unsecured loan agreement.

Subordinated loan means the lending of cash or collateral to a broker/dealer for use in the company. The lender has last claim in the assets in case of financial difficulties. This type of loan is usually obtained from the company's promoters or its directors.

Provisions (Hair cut) means an industry term that is applied to the value of an asset. Depending on its liquidity, the value is reduced by what amount could be expected if the asset had to be liquidated in a hurry.

Proposed Amendment:

(1) Every broker/dealer registered with the Commission shall compute and report in all statutory reports/filings its Net (liquid) Capital applying the following procedures:

(a)

	Total Assets	XXXX
Less:	<u>Total Liabilities</u>	<u>XXXX</u>
	<u>Net-Worth</u>	<u>XXXXX</u>
Less:	Non Currents Assets	XXXX
	Intangible Assets	XXXX
	Statutory Deposits	XXXX
	<u>Other Assets</u>	<u>XXXX</u>
	<u>Net Liquid Capital Before Haircut</u>	<u>XXXXX</u>
Less:	<u>*Total Risk Weight (Haircut Charge)</u>	XXXX
	<u>Net Liquid Capital</u>	<u>XXXXX</u>
Less:	Threshold (10% Aggregate Indebtedness)	XXXX
	<u>Excess/(Shortfall) Net Liquid Capital</u>	<u>XXXXX</u>

- (b) Broker/Dealers shall render monthly report on their Net Capital Position in a specified form to the Nigerian Stock Exchange and the Commission.
- (c) Any Broker/Dealer with a shortfall in net liquid capital shall be suspended from trading.

*Computation of Risk Weight (Haircut) shall be the summation of the following:

10% of Listed Equities (Nigerian);
15% of Nigerian Depository receipt NDR;
15% of Listed Preference Stock (Nigerian)
50% of Foreign Listed Securities/Euro Bonds;
100% of Unlisted Foreign Securities
10% of Foreign Currency balance /position not hedged
10% of Mutual Funds;
0% of Federal Government Bonds;
0% of Treasury Bills;

0% of Supra-national Bonds;
15% of Sub-National Bonds;
100% of Unlisted Equities (Nigerian) not traded in SEC registered OTC market;
20% of Unlisted Equities (Nigerian) traded in SEC registered OTC markets;
20% of Investment Grade Commercial Papers
20% of Bankers Acceptance and Certificate of Deposits
80% of Unsecured loans, receivables and advances to clients
15% of Margin loans and securities lending
100% of Non-investment grade Corporate Bonds
20% Corporate Bonds (Investment grade)
35% of Derivatives (Options and Futures)
10% of Exchange Traded Funds and REITS
10% Concentration charge on any instrument above 35% of Portfolio

Definition of Terms

Aggregate Indebtedness means total liabilities of a Broker-Dealer (including off-balance sheet items) arising in connection with any transaction whatsoever which among others include money borrowed, money payable against securities held, clients and non-clients free credit balances, lawsuit damages / penalties, guarantees and contingencies where occurrence of loss is probable.

Hair cut means a percentage by which investment in certain assets would be discounted to provide for market volatility and uncertainties.

Net liquid capital means an organization's net worth, which is calculated by subtracting its total liabilities from its total assets, including deduction of illiquid assets and haircut. It is the ability of an organization to meet its financial obligations to customers and creditors.

Networth means the difference obtained when the total liabilities are subtracted from the total assets of a stockbroking firm.

OTC (Over the Counter) Market means SEC registered decentralized market, without a central physical location where market participants trade unlisted securities through agreed electronic trading systems and in compliance with established market rules.

Other Assets refer to any other asset not specifically mentioned in the calculation above and is illiquid.

Quoted Investment means investment in securities that are listed on a recognized stock exchange.

Threshold means 10% of aggregate indebtedness. SROs shall establish early warning Net (liquid) Capital levels which is at 8 times the threshold.

Justification: *The new formula is more practical because it provides a logical method to compute and report Net Liquid Capital to the Commission and includes more definition of terms.*

SEC requires every broker/dealer to maintain at all times sufficient minimum levels of liquid assets or net liquid capital to enable broker/dealers to meet up with its short term obligations at any point in time.

The Net Liquid Capital Rule focuses on liquidity and is aimed at protecting investors, counter parties and creditors. It requires broker/dealers to have sufficient liquid resources on hand at all times to settle claims promptly. The Rule is to provide a cushion of liquid assets in excess of liabilities to cover potential markets, credit and other risks which may arise if the assets should be required to be liquidated. It provides liquidity test in relation to aggregate indebtedness (all liabilities) and client related receivables.

The table below provides justifications for the proposed haircuts on securities:

Asset Class	Recommendation	Justification
Listed Equities (Nigerian);	10%	Listed equities are marked to market hence quoted value in the financial statements is realisable. High haircut on this will push Brokers away from capital market into money market instruments (T-bills) with lower haircut. This is recommended to encourage greater participation in the capital market.
Listed Nigerian Depository receipt NDR;	15%	Same as Listed Equities (Nigerian). However the investors are also exposed to the risks in the economy of the issuer.
Listed Preference Stock (Nigerian)	15%	This is also marked to market hence quoted value in the financial statements is realisable, the 5% premium added over haircut for equities is due to the hybrid nature of the instrument.
Foreign Listed Securities;	50%	The 50% high hair cut is to compensate for country risk (political risk, exchange rate risk, economic risk, sovereign risk and transfer risk, which is the risk of capital being locked up or frozen by government action, restrictions on repatriation of capital, legal restriction etc)

Unlisted Foreign Securities	100%	This is due to the difficulty in valuation/ price determination as well as verification of securities, in addition to the risks that are associated with listed foreign securities.
Convertible currencies /position not hedged	10%	This is due to Foreign Exchange risk
Mutual Funds;	10%	Mutual funds are regulated by the Commission and valuation/price determination is available, value in the financial statements is realisable. This was recommended to encourage greater participation by market intermediaries and encourage development of the instruments and diversification
Federal Government Bonds;	0%	This is backed by the guarantee of the Federal Government of Nigeria.
Treasury Bills;	0%	This is backed by the guarantee of the Federal Government of Nigeria.
Supra-national Bonds;	0%	This is due to the quality of the instruments issued by international development agencies with very sound credit rating.
Sub-National Bonds;	15%	This instrument also has good credit rating however recent fall in commodity prices has exposed the vulnerability of state governments, the instrument is traded and marked to market, the 15% haircut is to account for liquidity/credit risk.
Unlisted Equities (Nigerian) not traded in SEC registered OTC market;	100%	This is due to the difficulty in valuation/ price determination.
Unlisted Equities (Nigerian) traded in SEC registered OTC markets;	20%	The OTC market allows for price discovery of these instruments, value of the OTC traded equities are marked to market hence quoted value in the financial statements is realisable.
Investment Grade Commercial Papers	20%	This instrument has short maturity.
Bankers' Acceptance and Certificate of Deposits	20%	This instrument has short maturity and is backed by the credit backing of the bank (guarantee of the bank)
Unsecured loans, receivables and advances to clients	80%	This haircut is after making appropriate prudential provision for non-performing loans.
Margin loans and Securities lending	15%	This is subject to the net realisable value of the collateral being higher than the loan/advance
Non-investment grade Corporate Bonds	100%	These are junk bonds.
Corporate Bonds (Investment grade)	20%	This is because the secondary market for corporate bonds is currently inactive and most bond holders are forced to hold-to-maturity.

Derivatives (Options and Futures)	35%	These are high risk and complex instruments.
Exchange Traded Funds & REITs	10%	This is because they have similar features with listed equities and the funds as well as the fund managers are regulated by the Commission.
Concentration charge on any instrument above 35% of Portfolio	10%	This is to account for concentration risk.

5. PROPOSED AMENDMENT TO RULE 125- PROHIBITION OF ASSIGNMENT

Full text of Existing Rule:

A custodian of securities shall not assign or delegate its functions as a custodian of securities to any other person unless such person is a registered custodian or depository of securities and has the written consent of the client to do so.

Proposed Amendment:

A custodian of securities shall not assign or delegate its functions as a custodian of securities to any other person unless such person is a nominee, registered custodian or depository of securities and has the written consent of the client to do so.

Justification: *To further give effect to the use of nominees by investors, custodians and other Capital Market Operators.*

6. PROPOSED CREATION OF A NEW RULE UNDER PART C13- RIGHT OF INVESTOR TO APPOINT CUSTODIAN

Proposed Creation of New Rule 126:

Investors shall reserve the right to appoint custodians that will hold their accounts, assets, securities and other investment instruments.

Justification: *To give investors especially retail investors the opportunity to choose the custodian(s) to hold their assets, securities and other investment instruments as against the current practice where clients' assets are pooled in omnibus accounts without the full knowledge or consent of the client(s). It would also give investors (who invest in shares) the right to appoint custodian(s).*

7. PROPOSED AMENDMENT TO RULE 132- USE OF NOMINEES

Full text of Existing Rule:

A custodian who uses nominee(s) to hold its clients' investments shall disclose to the Commission in advance the names of the nominee(s) it intends to use and ensure that:

- (1) the nominee acts only in accordance with its clients' instructions;
- (2) each nominee is dedicated to the holding and to activities relating to the holding of investments;
- (3) it accepts responsibility in writing to its clients for any of the nominees used, to the same extent as for its own action; and
- (4) any report on compliance by the Custodian with rules and regulations relating to clients' assets cover the nominee(s) as well.

Proposed Amendment: Use of Nominee Company

~~A custodian who uses nominee(s) to hold its clients' investments shall disclose to the Commission in advance the names of the nominee(s) it intends to use and ensure that:~~

A custodian shall use nominee(s) to hold its clients' investments and disclose to the Commission in advance the names of the nominee(s) it intends to use and ensure that:

~~(4) — any report on compliance by the Custodian with rules and regulations relating to clients' assets cover the nominee(s) as well.~~

(4) the nominee company is registered with the Commission to carry out the functions of nominee before engaging it

(5) all clients' assets are transferred to the nominee(s) immediately

Justification

- *The best way of ensuring segregation of clients' assets from the custodian's proprietary assets is by making it compulsory for the custodians to make use of a nominee to hold the clients' assets. Through this, commingling of assets and the risks associated with that are eliminated.*
- *To enable the Commission bring all Nominee Companies under proper regulation and hold them accountable for submitting reports to the Commission.*

8. PROPOSED AMENDMENT TO SCHEDULE I- REGISTRATION FEES, MINIMUM CAPITAL REQUIREMENTS, SECURITIES AND OTHERS

Proposed Amendment: Creation of Registration fee for Nominee

Registration fee of N500,000.00 and Minimum Capital of N1,000,000,000.00

Justification: *To include registration fee and minimum capital of Nominee company in the appropriate Schedule.*
